How much does a solar panel racking system cost?

How Much Do Solar Panel Mounting Systems Typically Cost? According to the National Renewable Energy Laboratory (NREL), the racking system commonly costs about \$0.10 per watt. However, ground mount systems cost more than rooftop solar systems because of additional hardware, permitting, and installation costs.

How much does a 6kW Solar System cost?

Including racking and mounting, an average 6kW solar system would cost about \$18,000 given the US average solar panel cost of about \$3.00 per watt as of January 2023. After applying the federal solar tax credit of 30%, that works out to \$12,600.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.
