

# How much does the generator of Fengjun 5 cost

How much does a generator installation cost?

Every home is different, and so is every installation. The placement of the generator, the amount of materials required, and the installation of the natural gas or LP fuel source all make estimating installation costs unique. A simple installation might cost about \$2,000, but it can be more than that depending upon your specific situation.

How much does a natural gas generator cost?

Natural gas generators cost \$2,000 to \$6,000 for a whole house unit, depending on size. They can be installed to a home's existing gas line and require no fuel storage. Natural gas is cheaper than diesel or propane, but relies on pipelines that may be shut off or damaged during severe storms.

How much does a portable generator cost?

"The largest expense by far is the cost of purchasing and installing the generator," according to Don Whaley, founder and former president of Direct Energy. Installation costs will vary by the type of generator you purchase. With a portable generator, there is no real installation cost.

How much does a generator transfer switch cost?

The average cost to install a generator transfer switch is \$400 to \$2,500 total. A generator interlock costs \$400 to \$850 installed and allows a portable generator to connect to the electrical panel without a transfer switch. Whole house generators may need additional accessories depending on the location and system type:

How much does a generator maintenance contract cost?

Annual generator maintenance contracts cost \$200 to \$650 per year and include a full inspection and oil and filter changes. A transfer switch or interlock connects a generator to a home's electrical panel. The average cost to install a generator transfer switch is \$400 to \$2,500 total.

How much does a standby generator cost?

Whole-house standby generators are permanently wired into the electric panel and automatically turn on during a power outage. Whole-home generators cost \$30 to \$170 per day to run and provide a power source for up to 500 hours continuously or three weeks. Standby generators last 15 to 30 years or 10,000 to 30,000 hours.
