

How to calculate the commission of photovoltaic panel salesperson

What types of employees are paid commissions in the solar sales industry?

There are three main employee types that are paid commissions in the solar sales industry. These include: Canvassers: While not directly involved in coordinating sales or transactions, canvassers help with all of the backend work such as lead generation, customer prospecting, and scheduling appointments for sales reps.

How do solar companies calculate commission rates?

Therefore, some solar companies calculate their base commission rate on the average solar system size and cost to install the system. Then, they'll couple this base rate with incentive multipliers to encourage better-than-average sales. Say your average system size is 6kW, and your average installation cost per watt is \$3.00.

What is a solar commission?

The solar commission is a rebate that helps offset the cost of installing solar panels on your home. To calculate your rebate, you'll need to know the size of your solar panel system in kilowatts (kW), the type of system you have (on-grid or off-grid), and the state in which you live.

How much does a solar panel salesman make?

Solar panel salesmen typically make a commission of around 10% for each sale they make. For instance, if a salesman sells a solar panel system for \$10,000, they can make a commission of \$1,000. Solar panel salesmen make their income through commissions from each sale.

How much do solar sales reps make per year?

The median annual salary for a solar sales rep is \$62,000, which is higher than the median salary for most other occupations. Solar sales representatives make between \$36,000 and \$90,000 per year, with the average salary around \$54,000. The top 10% of solar sales reps earn an average of \$100,000 per year.
