

# How to choose photovoltaic panels for home installation

How do I choose a solar panel for my home?

The type of solar panel, power output, efficiency, performance in warm climates, warranty, and price are the key factors to assess when comparing solar panels. The best solar panel for your home can depend on your roof space, shading, and climate. What are the best solar panels?

Should you choose a solar photovoltaic system?

Solar photovoltaic (PV) systems have become an increasingly popular choice for those looking to reduce their carbon footprint and save money on energy bills. Before choosing a new system, homeowners should know how a roof can impact options, the best ways to connect the panels, and more.

Which solar panels are best for your home?

SunPower, REC, Panasonic, Maxeon, and Jinko Solar offer the best solar panels. The type of solar panel, power output, efficiency, performance in warm climates, warranty, and price are the key factors to assess when comparing solar panels. The best solar panel for your home can depend on your roof space, shading, and climate.

How many solar panels do I Need?

Energy usage dictates how many solar panels you'll need, and it can even determine if it's worth it to go solar at all. The more energy you use, the bigger the solar system you'll need to cover your consumption. Most home solar systems use between 15 and 19 solar panels, but the exact number needed is unique for each home.

Should you install solar panels before installing a new solar system?

The time to contemplate any big near-term additions to your electrical needs is before you install solar because expanding an existing system later can be costly and problematic, says Los Gatos, CA, solar installer and energy podcaster Barry Cinnamon. You'll likely need to replace the inverter, and the new panels won't match the existing ones.

How do I choose a solar installer?

**Credibility and Expertise-** Seek out installers who have experience installing solar equipment and are knowledgeable about all aspects of the process. A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed.
