Why do we need special connection technology for battery storage systems?

Special connection technology optimized for use in storage systems is required in order to connect these storage systems quickly,safely,and efficiently. Busbar connections and battery-pole connectors for battery storage systems are safe and cost-effective. Find out more here in the video.

Why should you use DC connectors for home storage applications?

The new connectors for home storage applications are especially suitable for use on battery inverters. DC connectors protected against polarity reversal prevent mismatching in common PV connection technology and battery-pole short-circuits. Energy storage systems enable the self-consumption of renewable energy regardless of when it is generated.

How to monitor the smartcabinet?
