

# How to install the telescopic tube of photovoltaic bracket

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do I install rigid solar panels on my roof?

EcoFlow's rigid solar panels come with a EcoFlow Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How do I Mount my solar panels?

Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the EcoFlow Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels.

How to install a solar tube?

Choose the ideal spot for your solar tube. Place the dome in a clear area far from any shade. When choosing the appropriate location, take into account the type of ceiling, its length, and the shadow. Make sure there is no obstruction in the area between the ceiling and roof holes. Next, indicate the locations for your tube's entry and exit. 5.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you attach solar panels to a wooden frame?

You'll need clips or battens to attach solar modules to a wooden frame. As you can see, different materials come with different benefits and drawbacks. Which choice is right for you can depend greatly on your budget, environment, and where you want to mount the array. There are multiple options for mounting your solar panels.
