

Huawei A-type solar bracket

How much power does a Huawei inverter use?

At Huawei, innovation focuses on customer needs. We invest heavily in basic research, concentrating on technological breakthroughs that drive the world forward. Recommended max. PV power 2 *1 Available in 2021 Q1. *2 Inverter max input PV power is 10,000 Wp when long strings are designed and fully connected with SUN2000-450W-P power optimizers.

How to install Huawei AP?

Connect the extension cable to the AP, route the cable through the hole on the mounting support, and hang the AP on the AP mounting bracket. When installing the device on the mounting support, ensure that the arrows on the mounting support point upward and the Huawei logo on the device cover is the right way up.

How to connect SMA RF cables to Huawei AP?

Connect four SMA-to-N RF cables according to Table 2-279. After the cables are connected, tighten the RF cables at their junction. Do not connect the SMA connectors to the 5G ports on both sides of the AP. Insert RF loads (50 ohms) into idle RF ports to prevent radio interference. Huawei offers 50-ohm RF loads (part number: 27110089) for purchase.

How do I install the AP mounting bracket?

Secure the antenna to the mounting support. Use two M4x12 screws to secure the AP mounting bracket to the mounting support. During installation, ensure that the AP mounting bracket and the mounting support face the same direction according to the signs on them. Install both M4x12 screws in the A holes on the AP mounting bracket.
