

# Huawei Energy Storage System Recruitment

How many employees does Huawei have?

Hello, it's us! We, as one of the world-leading global ICT companies, have always been committed to creating a diverse, open, and inclusive working environment. Today Huawei employs more than 207,000 employees from 170+ countries and regions. At Huawei, we embrace all types of talents from all over the world.

What's it like working at Huawei?

One of the most important things I have learned at Huawei is not to be afraid to push your limits. Push yourself a step forward, reach a bit further than you expected, and ask for more. If you aim higher, you'll learn faster and grow. People are encouraged to reflect on their work and themselves. And then to improve.

Why should you choose Huawei digital power?

We are at the forefront of a promising industry and ready to embrace a future with great opportunities. Huawei Digital Power will continue to lead technological innovation and facilitate the healthy development of the renewable energy industry in the direction of PV+ESS integration for a greener future.

What is Huawei's CSR program?

Huawei's flagship CSR program at the corporate level. A partnership between Huawei and Academies around the world for students. A dynamic program that takes place all over Europe for young Huaweiers. Huawei's initiative and long-term action in the field of digital inclusion. A campus developer organization represented by campus ambassadors.

Does your value matter at Huawei?

At Huawei, we embrace all types of talents from all over the world. Here your value matters more than your labels. Irrespective of where your journey began, we only care about where you are heading - building a fully connected, intelligent world together. Click the video, and check out what our Huaweiers have to say!

The first step in the official recruitment process is an introductory screening call with recruitment HR to ensure you fulfill all the requirements and are a good fit for the vacancy. Our team will directly contact suitable applicants.

An energy storage system with higher energy density is needed in the 5G era. Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a comprehensive energy storage system, ...
