Chinese battery maker CATL has announced an investment of \$7.6 billion in building Europe's largest battery plant in Hungary. The world's biggest electric vehicle battery maker gears up to meet growing demand from global automakers. CATL said that construction of the 100 GWh (gigawatt hours) plant in the eastern Hungarian city of Debrecen, its biggest

The battery industry is what makes the Hungarian automotive ecosystem outstanding and unique in Europe. According to BloombergNEF's research on capacity expansion, Hungary has a good chance of becoming the world's 4th largest battery producer.

Hungary is a hub for carmakers ranging from Mercedes to Suzuki. The country has moved aggressively to court battery makers to put the country at the forefront of the transition to electric vehicles. Chinese giant CATL is pouring 7.3 billion euros (\$7.8 billion) into building a lithium-ion EV battery plant, under a deal announced in August.

In addition, it has been reported that in order to improve the energy density of the battery, Samsung SDI will start using NCA (lithium nickel cobalt aluminum oxide) type cathode material in Hungary. Previously, NCA was mainly supplied by Panasonic and Tesla. It is speculated that, NMC (Ni-mn-Co) materials will continue to coexist with NCA.
