

Why did Hungary declare a state of energy emergency in July 2022?

In response to the current global energy crisis, Hungary declared a state of energy emergency in July 2022 that allowed the government to increase domestic gas and coal production, secure additional gas imports from Russia and increase the output of the Munkacs coal power plant.

What is Hungary's Energy Policy Strategy in 2022?

In 2022, Hungary's energy policy strategy focuses on strengthening the country's energy independence. Russia's invasion of Ukraine in February 2022 has created a new set of energy security challenges in Europe. In response, Hungary declared a state of energy emergency on 13 July 2022.

Does Hungary have a commitment to renewables?

Attila Steiner, Hungary's State Secretary for Energy and Climate Policy, said: "Hungary has a strong commitment to renewables. As the next step, the government's priority is to upgrade the national grid to be capable of integrating the rapidly growing electric capacity generated by weather-dependent energy sources.

What is Hungary's Energy Strategy?

Under Hungary's energy strategy, the government's stated policy objective is to reduce import dependency. Hungary's dependency on energy imports has increased over the last decade as demand for fossil fuels has increased. Despite greater diversification of oil supply, the country remains heavily dependent on Russian oil and gas.

Can Hungary achieve more energy security and independence?

Hungary's transition to clean energy can enable it to achieve greater energy security and independence as it navigates the supply challenges that Russia's invasion of Ukraine has created for countries across Europe, according to a new in-depth policy review by the International Energy Agency.

What type of energy is used in Hungary?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings.
