

IKEA solar photovoltaic panels

What is home solar with IKEA?

Home Solar with IKEA combines the strengths of IKEA retail and knowledge of life at home with the expertise of SunPower, a trusted brand with more than 35 years in the solar industry. SunPower is known for delivering high quality, innovative solar products and making it simple for its customers to switch to renewable energy.

Does IKEA sell solar panels?

The new project, according to a news release, is a collaboration between Ikea's US branch and SunPower, a California-based company that sells and installs solar power products, including solar panels. The line of home solar products, called "Home Solar," will be available to members of IKEA's customer loyalty program, according to the release.

What is the IKEA and SunPower home solar partnership?

Through this collaboration, members of the IKEA Family customer loyalty program will be able to purchase home solar solutions, available through SunPower, to generate and store their own renewable energy and live more sustainably. Home Solar with IKEA is expected to launch in select California markets in Fall 2022.

Why is IKEA launching home solar?

"The launch of Home Solar with IKEA will allow more people to take greater control of their energy needs, and our goal is to offer the clean energy service at additional IKEA locations in the future," he said. The introduction of solar products is Ikea's latest eco-friendly initiative.

Does IKEA have a solar farm?

It has more recently turned to massive solar farms to offset its energy use further. In September 2019, IKEA invested in two solar farms in the US - one in Utah with 636,000 panels and another in Texas with 823,000 panels. IKEA owns 49 percent of the projects.

Can IKEA make solar panels as affordable as its Billy bookshelf?

The stated goal of Ikea's solar efforts is to zero out the emissions generated to power its plugged-in products, which the company estimates are about 20 percent of its total. Now let's see if Ikea can make solar panels as ubiquitous and affordable for U.S. homes as its Billy bookshelf -- one of which is made every three seconds.
