

Iceland solar charger

Where can I find a charging cable in Iceland?

An electric car in Iceland comes with a charging cable in the vehicle. You can also use the navigation system in the car or Google Maps to find charging stations around the country.

What type of Charger do EVs use in Iceland?

EVs in Iceland generally use the European standard Type 2 (Mennekes) connector and CCS Combo Type 2. Some older vehicles use Type 1 (J1772) and CHAdeMO. As of 2022, there are over 445 charging stations in Iceland, including 89 DC fast chargers (50-350kW power) and the remainder being AC (mostly 3-phase 22kW).

Is it legal to use EV chargers in Iceland?

Yes, EV chargers are legal in Iceland. However, there is a problem with ICE cars and even some EVs blocking EV chargers. Unfortunately, you can only request to have them legally towed away if they are marked with an official sign (which is typically not the case).

Can I use my cell phone charger in Iceland?

If your cell phone is a GSM phone with AT&T or T-mobile, capable of quad-band, you will be able to use your cell phone charger in Iceland. However, you will need to call your service provider to ensure roaming is active.

Where can I get a charging key in Iceland?

For locations, see their map. You need an Icelandic ID number ('kennitala') to order the RFID charging keys, so tourists cannot obtain these directly. At least one Icelandic car rental company provides ON keys when renting from them.

Where can I get Free charging in Reykjavik?

Free charging stations can be found in the Reykjavik area at shopping malls and IKEA. Kringlan and Smáralind malls offer free charging at a few spots of their parking spaces (marked in green) on Plugshare.

The vast majority of camp-sites offer access to electricity (although you might need a long extension cord) plus you can use car-chargers while driving for most appliances. (And yes - you are required by law to use legal camp-sites overnight).
