electrical energy from a grid or any other source and provide electrical energy to a grid. By that feature it maintains the balance between electrical energy demand and supply over a period of time. TC 120 considers all storage technologies as long as they are capable to store and to discharge electrical energy.

The early vision for IEC was to establish a secure settlement that caters to the current and future needs of the energy sector. With much of this vision now realized, the team's new goals are focused on sustaining a thriving, expanding community; hence new facilities are coming online helping residents live productive and rewarding in the heart of the Southern Oilfields.
