I want a quote for 8x w canadian solar panels mounted with renusole/variosole rails, middle clamps and end clamps, the furthest point away from the inverter is max 10 meters, i want 6mm pv cable, 2 strings of 4 pannels each, then i want 2x 25Amp 2pole dc circuit breakers one for each string and then i also want 2x dc surge arrestors one for ...

An 82.0 % solar access means that 18.0% of the energy is lost due to shadows caused by nearby obstacles. A 95.7 % solar potential indicates that it is underutilizing 4.3 % of energy compared to an optimal orientation of the plane. A 78.4 % solar utilization results from the multiplication of the solar access and solar potential.
