

How is India advancing Advanced Energy Solutions?

As the world watches, India is progressing advanced energy solutions rapidly. India is setting ambitious targets for deploying advanced energy solutions such as clean hydrogen, energy storage and carbon capture. By 2030, it plans to invest over \$35 billion annually in these areas.

How much will India invest in energy storage by 2030?

Based on announced pledges, India is expected to invest more than \$35 billion annually across advanced energy solutions by 2030 (excluding any solar or wind investment). Investment in battery storage alone must reach \$9-10 billion annually. Fast renewable growth drives exponential demand growth for energy storage in India.

What is India's national electricity plan (transmission)?

India has unveiled its National Electricity Plan (Transmission), targeting 500 gigawatts (GW) of renewable energy capacity by 2030 and over 600 GW by 2032. Developed by the Central Electricity Authority (CEA), the plan addresses rising energy demands. It supports the nation's goal of net-zero emissions by 2070.

How has India achieved its energy transition goals?

India has set bold ambitions and demonstrated remarkable progress on energy transition investment. For example, it surpassed its 2030 goal of achieving 40% of installed capacity from renewable energy sources nine years in advance.

What will India's energy future look like?

According to Jennifer Granholm, US Secretary of Energy, "In so many ways, the world's energy future will depend on India's energy future." In line with this, the country is adopting ambitious goals for deploying solutions such as clean hydrogen, energy storage, carbon capture and sustainable aviation fuels.

Will India achieve 50% power generation capacity from non-fossil fuel-based sources?

This is well ahead of the Government of India's target to establish 50% cumulative power generation capacity from non-fossil fuel-based sources by 2030, according to the latest POWERup quarterly report from the Institute for Energy Economics and Financial Analysis (IEEFA).

As the foremost theatre for containing and mitigating the effects of climate change, India has to remain invested in trusted AI deployment for its energy sector, be it for renewable energy, energy efficiency in end-use applications, demand-side management and anything that comes in between. AI and QC will be demanding frontiers of technology.

1 ??· Get the latest Siemens Energy AG (ETR: ENR) stock price quote with financials, statistics, dividends, charts and more. ... maintenance, customer training, and professional consulting services for central and distributed power generation; and high voltage direct current transmission systems, offshore windfarm
