

What is the Eurobat Premium System?

The European Commission accused five starter batteries manufacturers (Banner, Clarios, Exide, Elettra and Rombat) of creating, publishing and agreeing to use new indices in their price negotiations with car producers, which is known as the 'Eurobat Premium System'. The Commission made this statement in a press release.

What are Eurobat and Kellen?

Eurobat and its service provider Kellen are a trade body and its service provider that were accused by EU antitrust regulators on Thursday for breaching antitrust laws by operating a cartel to fix battery prices.

How can India contribute to the global battery supply chain?

Yet, India faces other challenges such as limited resources of lithium, nickel, and cobalt. To incorporate India into the global battery supply chain, India and the international community should collaborate on trade, investment and financing, and research.

1. INTRODUCTION The global automotive industry is experiencing a major transformation.

Could India import end-of-life batteries?

Many governments are mandating recycling for end-of-life batteries, but these countries lack adequate recycling capacity. India could import these end-of-life batteries, converting them into black mass that can be processed domestically or, as already occurs, exported overseas.

Does India have a battery production capacity?

Similarly, India does not have sizable production capacity for battery cells (i.e., less than 1 percent of global capacity), but Indian companies are building battery cell production facilities, with LFP chemistries estimated to represent 70 percent of India's future battery production.

Could India export lead-acid batteries to South Korea?

Similarly, India, which already exports lead-acid batteries to many countries, could export LFP battery cells and battery packs for two-wheeled and three-wheeled vehicles to countries in South Asia and Southeast Asia. It could continue to export black mass for recycling to South Korea too.

The 8th Edition of World Energy Storage Day (WESD) - Virtual Global Open Conference to commemorate the World Energy Storage Day on 23 September. WESD is a global movement initiated by various apex trade bodies working to promote and adopt energy storage, e-mobility & green hydrogen technologies for a sustainable future. The WESD platform is one of the largest ...

The new website showcases the connections between lead, lithium, nickel and sodium-based batteries and their applications under current European Union legislation and initiatives in support of the EU's "Green Deal"

...

December 6, 2023: EU competition chiefs have accused Clarios, Exide Technologies, Banner, Rombat, Fiamm Energy Technology and its predecessor Elettra of possible collusion to fix starter battery prices, aided by trade ...

Date: June 4 - 5, 2024 The Eurobat Forum is the annual event of the association of European automotive and industrial battery producers, bringing together more than 100 key European automotive and industry stakeholders, including senior company executives, policy-makers, association and NGO representatives and more.

"We are concerned that battery suppliers limited price competition, thus harming their customers, in this case car producers, and, ultimately, European consumers." Initial responses. Of the battery ...

This updated roadmap serves as a strategic guide for policy makers and stakeholders, providing a detailed overview of the current state and future directions of battery technologies, with concluding recommendations with the ...

March 11, 2021: EUROBAT, the European association for manufacturers of automotive, industrial and energy storage batteries, on March 1 published its full response to the European ...

It was also the first-ever battery that could be recharged by reversing the current through it. Other chemistries -nickel- and zinc-based - followed, including the first alkaline battery. A major breakthrough was achieved in the early 1970s with the launch of the first commercial lithium and lithium ion battery.

June 2, 2022: EUROBAT has unveiled a new website that highlights the myriad of applications supported by automotive and industrial batteries -- and the benefits the mix of technologies ...

This position makes several recommendations to improve the Joint Research Centre's 2nd draft methodology to calculate and verify the carbon footprint of industrial batteries. Critically, EUROBAT calls on the Commission to base the calculation of the functional unit of off-the-shelf batteries on the durability and performance parameters referred to in Art. 10 of the ...

This position paper provides recommendations on harmonised specifications for battery levels, specifically as regard the listing of hazardous substances. In connection with the labelling issue, the documents also aims to shape expected delegated act(s) revising Annex XIII of the Batteries Regulation regarding the information requirements for the battery passport. ...

EUROBAT further enlarges membership with arrival of Norwegian battery company EUROBAT, the association of European automotive and industrial battery manufacturers, is pleased to confirm that F... Read more. 02 September 2021 Press Release Battery manufacturer CATL joins EU battery association

EUROBAT.

(Digital Battery Passport). About EUROBAT EUROBAT is the association of the European Manufacturers of automotive, industrial and energy storage batteries. EUROBAT represents more than 90% of the automotive and industrial battery industry in Europe though its more than 50 members from across the continent.

14:15-14:55 Presentation of the EUROBAT Battery Innovation Roadmap 2.0. Bernhard Riegel, Director Research & Development, Hoppecke; Christian Rosenkranz, Vice President Industry & Government Affairs EMEA, Clarios; Holger Fricke, Director Basic Research R& D EMEA, Exide;

The Technical Annex of the Roadmap is specifically designed for the European R& D community, providing deeper technical insights into ongoing research and innovation efforts towards 2035 and beyond. The Technical Annex adopts a more market-oriented approach to highlight what is driving R& D to support further electrification in a various battery-powered end ...

EUROBAT, along with the European Portable Battery Association (EPBA) and Recharge, have released its latest guidance focusing on the definition of a battery and its implications within the framework of the EU Batteries Regulation (EU 1542/2023). Understanding which objects meet the battery definition is essential for ensuring compliance with the Batteries ...
