

Industrial solar panels Cuba

Can solar power solve Cuba's energy problems?

In a nation with plentiful sunshine, Cuban officials have long had the opportunity to encourage solar power as one solution to national energy problems. But October's sweeping outages -- the island's worst power failure in years -- show little progress has been made.

Is Cuba wasting solar energy?

The opportunity now for individuals to import their own photovoltaic systems to Cuba, may change this situation. With just 20,000 solar water heaters and a million kWh every day of energy installed in its photovoltaic parks, Cuba is basically wasting the vast majority of the solar energy it has available. Read more from Cuba here on Havana Times.

Should Cubans buy solar panels paired with batteries?

The minister of energy and head of the nation's electric utility encouraged Cubans to buy rooftop solar systems paired with batteries, instead of the gas and diesel generators purchased by Cubans who can afford them.

How many solar projects are there in Havana?

On the island, technicians are working to install 26 solar projects in different provinces, Lpez told official media last week. Installations will ramp up fivefold over the next decade, said Ldice Vaillant, head of the Photovoltaic Research Laboratory at the University of Havana.

What if Cuba had built out more solar power?

Cuba's large-scale blackouts that left 10 million people without power this month wouldn't have happened if the government had built out more solar power to boost its failing electric grid as promised, some experts say.

Does Cuba have a domestic RES industry?

Cuba is developing a domestic RES industry, including solar panels, wind turbines, hydro turbines, poles, and boilers for use in small bioelectric plants. This strategy is expected to enable Cuba to integrate domestic products into RES projects, thus reducing import costs and energizing the economy.
