

Can Guinea Bissau use solar energy?

Table 1: Solar insulation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m<sup>2</sup>/day (table 1),GB should be able to take advantage of all solar energy applications.

Who manages the electricity sector in Guinea Bissau?

The National Electricity and Water Corporation (EAGB) manages the electricity sector in Guinea Bissau. On a regional level, the country is a member of the West African Power Pool. The main sector policy is the National Energy Policy 1995, and more recently, the Energy Master Plan of 2013.

Is Guinea-Bissau a viable energy resource?

The coast of Guinea-Bissau, with its deeply indented coastline, experiences high tidal range values making this a commercially viable energy resource. The highest mean annual tidal amplitude of 3.4 m was recorded at Porto Gole, on the banks of Rio Geba and could generate 50 MW of electricity (REEEP, 2012); (DICAT, undated).

What is the most popular solar application in Guinea Bissau?

As of today, the most popular solar application is the rural individual photovoltaic system that has been exploited in Guinea Bissau for the producing electricity to power houses, schools, offices and hospitals or health centers. Solar water pumping is the second most installed solar application in GB (Ex. PRS I and II in Table 2).

Is hydroelectricity a viable source of energy in Guinea-Bissau?

But by 2015 hydroelectricity was not still not an important source of energy. The coast of Guinea-Bissau, with its deeply indented coastline, experiences high tidal range values making this a commercially viable energy resource.

What is wind energy used for in Guinea Bissau?

Wind energy is extracted from wind speeds by wind turbines. It was first used to produce mechanical power (windmills). Nowadays, it is mainly used for the production of electrical power. Unfortunately, none were counted in Guinea Bissau.
