

Does Iraq have a power outage?

Power outages are part of daily life in Iraq, but older generations can vividly recall a bygone era under the previous regime when electricity was stable and consistent. Before the 1980s, Iraq boasted one of the most developed energy sectors in the region.

Can Iraq achieve energy self-sufficiency without regional aid?

However, the path to energy sufficiency remains a considerable challenge for Iraq even with regional aid. Without domestic reforms to address the underlying causes of the energy crisis, Iraq's journey towards achieving energy self-sufficiency is still a considerable distance away.

Why should Iraq modernize its energy system?

Ziad Ali Fadhil, Iraq's Minister of Electricity, stated: "This modernization aligns with our strategic objectives and marks a significant achievement in Iraq's energy transition. It enables increased electricity generation and enhances fuel efficiency, which will, in turn, reduce carbon intensity."

Can Iraq meet energy needs in a way that achieves security?

Meeting energy needs in a manner that achieves security for Iraq has become a major source of concern for the electricity sector in the country; with the industry claiming that it lacks the capacity to meet current peak demand, especially with production running at about 50% of the country's requirements.

How can Iraq improve its energy sector?

The report, Iraq's Energy Sector: A Roadmap to a Brighter Future, concluded that the best way forward was "cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix."

How much electricity does Iraq need?

In 2010, Iraq's demand for electricity was estimated at 57 TWh (TW (terawatt) is the largest unit used for measuring electrical power generation on a national scale. 1 TW = 10¹² Watts;), at a time when the country was unable to supply more than 58% of its energy needs, i.e. only about 33 TWh.
