Why do we need a standard for solar energy in Ireland?

Climate change is a significant issue facing Ireland today. This standard recommendation will support the development of industry and the deployment of renewable solar energy in Irish homes and provide a clear understanding to industry for the installation of these systems. Buy the standard here

How much solar electricity is produced in Ireland?

In Ireland, around 75% is produced from May to September. If this electricity is not used in the home it is exported to the grid. It is desirable to maximise the amount of solar electricity you use in your home. You can do this by sizing the solar PV system to meet your demand.

How do I get a solar energy grant in Ireland?

Domestic applicants can apply to the Sustainable Energy Authority of Ireland (SEAI) for a grant towards the cost of installing Solar PV equipment. In 2023, capital grants are available up to a maximum of EUR2,400

Which solar technologies are best suited for use in Ireland?

There are two broad groups of technologies which generate electricity from light. Of these, solar PV technologies are best suited for use in Ireland. These are the most common solar technologies worldwide. They are also the fastest growing in terms of installed capacity.

Do solar panels work in Ireland?

The term "solar panel" is often used interchangeably to describe panels generating electricity and those generating hot water. The former are photovoltaic (PV) modules and are best suited to Ireland. The latter work best in places with year-round sunshine, though technological enhancements mean they can be deployed here.

How has solar impacted Ireland's energy security?

More recently, these blockages have largely been addressed, including removal of VAT and scaling up of grants. The Irish Solar Energy Association (ISEA) has charted solar's remarkable growth and impact in easing dependence on fossil fuels, and our precarious lack of energy security.
