The Reflect Orbital startup is set to make it a reality by developing "a constellation of revolutionary satellites to sell sunlight to thousands of solar farms after dark." The team wants to set up the satellites so they circle the planet and reflect the light.

Una startup della California chiamata Reflect Orbital sta progettando un metodo per offrire e vendere la luce del Sole quando non è disponibile, ovvero durante la notte. L'idea, al momento solo ...

Reflect Orbital: Sonnenlicht auch nachts durch Sonnenspiegel. Solarfarmen könnten von der Technologie der weltweit ersten Sonnenspiegel profitieren. In den Dämmerstunden würde es dann mehr ...

Sin embargo, una nueva propuesta de la start-up californiana Reflect Orbital, liderada por su fundador Ben Nowack, podría cambiar este paradigma. Reflect Orbital propone reflejar luz solar de noche con satélites. ...

Reflect Orbital sells sunlight from orbit to solar farms and large-scale lighting applications after sunset using a very large constellation of in-space reflectors. More hours of sunlight translates into higher solar energy production for existing solar farms and other economic benefits.

Reflect Orbital is a company focused on delivering sunlight to Earth after dark using a network of in-space reflectors. They aim to capture and utilize solar energy, which is vastly abundant, to support sustainable energy solutions on Earth. Their innovative approach involves redirecting sunlight using mirrors positioned in space, potentially ...
