

Is Optics Valley powered by solar energy

What is Optics Valley known for?

Optics Valley is known for its optics industry and research, as well as for the astronomical observatories located there. Based on the idea of a technology cluster such as Silicon Valley, the clear skies and isolated peaks in southern Arizona make for superior observing conditions.

What will Optics Valley look like in the future?

In the future, Optics Valley will adhere to the priority of green development, focus on building a world-class science city, and develop modern industrial clusters with regional influence, in order to bring Optics Valley closer to the world and ensure everyone there has a stronger sense of identity and happiness.

Where is Optics Valley in China?

Optics Valley is adjacent to the Yangtze River in the north and Liangzi Lake in the south. [Photo/Optics Valley of China] In the east of Wuhan, Hubei, the State-level East Lake High-tech Development Zone is more widely known as Optics Valley of China (OVC). Last year, its total GDP exceeded RMB 240 billion.

Is Optics Valley a good company to start a business?

Supported by Optics Valley's favorable policies and friendly environment for startups, the company's revenue reached 40 million yuan last year, and the number of employees is expected to rise to 200 by the end of this year. The company has two main product lines: 3D image sensors and smart audio amplifiers.

Where is Optics Valley located?

Optics Valley is adjacent to the Yangtze River in the north and Liangzi Lake in the south. It has 9 lakes and 44 mountains and hills, occupying half of the area. On the Longquan Mountain beside Liangzi Lake, there is a cultural site -- the tombs of the Chu kings in the Ming dynasty.

Why should you visit Optics Valley?

Optics Valley not only has clear water and beautiful scenery, but also fresh air. The sound ecological environment attracts a large number of birds to settle down. Not long ago, Wuhan bird watchers discovered a new breeding ground for the Baer's pochard, a rare species, at Baoxie Lake in Optics Valley.

If this year is anything to go on, renewable energy may have a bright future in northern Arizona. Last week, water and power utility Salt River Project announced it would be working with the ...
