

Is home solar power generation worth it

Are solar panels worth it?

Solar panels are expensive, so they can sometimes not be worth the initial outlay if you're planning to move home within the decade. Also, while living with green energy is definitely a good thing to do in terms of the environment, solar panels might not be to everyone's tastes on top of their homes.

Do solar panels increase property value?

Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result. That might seem like a long time, but it's worth remembering that solar panels can provide all of your energy needs, making your home potentially energy self-sufficient.

Should you consider solar panels as a home improvement?

It's also worth considering solar panels' value as a home improvement. Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result.

How much does a solar panel system cost?

Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. The average domestic solar panel system is 3.5kWp and costs around £7,000.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.
