

Is it okay for two people to install photovoltaic panels

Should you choose a solar photovoltaic system?

Solar photovoltaic (PV) systems have become an increasingly popular choice for those looking to reduce their carbon footprint and save money on energy bills. Before choosing a new system, homeowners should know how a roof can impact options, the best ways to connect the panels, and more.

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Do solar panels add value if you move?

However, adding a solar system can still benefit you financially if you move. According to a few studies, solar panels increase your home's value by about 4%. Just be wary of leasing solar panels if you think you might move. Leases are typically long-term and can be difficult to cancel, making it more challenging to sell your home.

Can solar panels be reinstalled if you move?

Homeowners have a few options with their solar panels when moving. If your new home is only a short distance away, the solar installer should be able to handle the reinstallation at your new location. However, if you are moving to another city or state, you'll have to weigh the costs versus benefits.

Are solar panels worth it?

If you install solar panels now at an average cost of \$20,000, you can save more than \$40,000 over the next two and a half decades. The bottom line is that solar panels are almost always worth it if you own your home and have an electric bill. How much money you can save varies for every property.
