

Who is Islands Energy Group?

Islands Energy Group is made up of three businesses based in Guernsey, Jersey and the Isle of Man - Guernsey Energy, Island Energy and Isle of Man Energy. It is the only gas supplier for domestic, commercial and industrial customers in the islands. It also sells domestic appliances including cookers and washing machines.

How much energy does Energia supply in Ireland?

Energia Group supplies approximately 17% of the island of Ireland's total electricity requirements and 20% of the island's total wind power meeting the energy needs of 800,000 homes and businesses with competitive electricity and gas services provided through its two retail brands Energia and Power NI.

How much does energy cost in Ireland?

The cost of all energy imports to Ireland was approximately EUR5.7 billion, down from EUR6.5 billion (revised) in 2013 due mainly to falling oil and, to a lesser extent, gas import prices. Consumption of all fuels fell in 2014 with the exception of peat, renewables and non-renewable wastes.

Is Ireland a net energy importer?

Ireland is a net energy importer. Ireland's import dependency decreased to 85% in 2014 (from 89% in 2013). The cost of all energy imports to Ireland was approximately EUR5.7 billion, down from EUR6.5 billion (revised) in 2013 due mainly to falling oil and, to a lesser extent, gas import prices.

How many people use electricity in Ireland & Northern Ireland?

The electricity sectors of the Republic of Ireland and Northern Ireland are integrated and supply 2.5 million customers from a combination of coal, peat, natural gas, wind and hydropower. In 2022, 34 TWh were generated.

What is Dublin Waste-to-energy facility?

The Dublin Waste-to-Energy Facility burns waste to provide heat to generate electricity and provide district heating for areas of Dublin. The contribution of non-renewable energy to Ireland's energy supply is shown by the graph. The quantity of energy is in thousand tonnes of oil equivalent.

We are a modern integrated energy utility committed to playing a leading role in powering the energy transition across the island of Ireland. Significantly increasing our generation from renewables, supporting our customers to decarbonise, supporting the rapid transformation of the energy system and powering a new model of economic growth are ...

Energia is a leading developer and operator of renewable energy across the island of Ireland supplying 21% of Ireland's wind energy. Energia's growing renewable energy portfolio consists of 15 onshore wind farm sites, which generate over 300MW of green electricity and an additional 900MW through Power Purchase Agreements (PPAs).

Energia is one of the longest suppliers of Renewable Electricity on the island of Ireland. We have 16 operational windfarms and an extensive pipeline of new renewable projects. As Customer Solutions, we are addressing the challenge of climate change with energy efficiency initiatives while passing on the many advantages these opportunities ...

In addition, the Government of Ireland has announced a fourth scheme to credit every domestic electricity customers" account with EUR250 during 2024 and into 2025, due to the inflated wholesale costs of electricity. [LEARN MORE](#) . Today's decisions transform tomorrow. 0 % Renewable Energy supplied to all our customers in their businesses and ...

The leading electricity provider in Ireland, choose Energia for affordable green energy solutions. Join over 350,000 customers in Ireland and save up with our energy plans, smart tech and service options.

As an island we have plenty of coastline - and plenty of wind. Offshore wind farms will ensure Ireland has a secure, clean source of energy. But an offshore wind farm needs specific conditions. Surveys are carried out and we work with communities and local experts to identify the best sites for potential wind farms.

We have been set a task by the Government - to get the electricity system ready for a future without fossil fuels like coal, oil, peat and gas. Specifically, we have been asked to prepare for 70% of Ireland's electricity coming from renewable sources by 2030. This is a key step towards the aim of Ireland having net-zero carbon emissions by ...

As of 2021, the island of Ireland had 5,585 MW of installed wind power capacity, with 4,309 MW in the Republic of Ireland. In 2020, wind provided over 86% of Ireland's renewable electricity and generated 36.3% of Ireland's electricity ...
