They had arrived on the Cyclops, a naval vessel that last visited St Helena half a century earlier. It is the final picture ever taken of St Helena's liberated slaves, but DNA may soon offer one more.

Islanding is the intentional or unintentional division of an interconnected power grid into individual disconnected regions with their own power generation.. Intentional islanding is often performed as a defence in depth to mitigate a cascading blackout.If one island collapses, it will not take neighboring islands with it. For example, nuclear power plants have safety-critical cooling ...

Saint Helena is a volcanic and tropical island, located in the South Atlantic Ocean, some 1,874 km (1,165 miles) west of mainland Africa, with Angola and Namibia being the closest nations, geographically. The island is located around 1,950 km (1,210 mi) west of the coast of southwestern South Africa, and 4,000 km (2,500 mi) east of Rio de Janeiro, Brazil.

The Roads, St Helena (George Hutchins Bellasis, 1815). Sint-Helena (Engels: Saint Helena) is een eiland in het zuiden van de Atlantische Oceaan, zo'n 2000 km ten westen van de Afrikaanse kust. Het is onderdeel van het Brits overzees gebiedsdeel Sint-Helena, Ascension en Tristan da Cunha en economisch volledig afhankelijk van het Verenigd Koninkrijk. De inwoners van Sint ...

Further information on water restrictions, and information about how agricultural consumers can apply for exemptions, can be found on pages 28-29. This is the first time since 2016 that the island has had such a severe shortage.

Island Mode Operation Captive Power Plant. Gas engines are well suited to acting in island mode operation as a captive power plant helping to support a facility's resilience, either on their own, or as part of a wider microgrid. Island mode operation relates to those power plants that operate in isolation from the national or local electricity distribution network.
