How much does a 3KW Solar System cost?

A solar panel system with 3 kW of capacity typically costs around \$9,000-- or roughly \$6,300 after applying the federal investment tax credit, which can recoup up to 30% of your total upfront costs.

How much electricity does a 3KW Solar System produce a month?

Over 30 days, your system would produce about 420 kWh of electricity per month. That's 420 kWh you don't have to pay your utility company for. Based on the national average electricity rate of around 14 cents per kilowatt-hour, a 3kW solar energy system could save you an average of about \$60 per month on energy bills.

Can a 3KW Solar System be made of 300 watts?

In theory, you could design a 3kW system with any wattage of solar panel, but there are practical factors (like space needs and wiring) for you to consider. For instance, even though 100-watt panels may be cheaper than 300-watt panels, a system made of 300-watt panels would only require a third of the installation space.

How many solar panels do you need for a 3KW system?

The number of solar panels you need for a 3kW system depends on the wattage of your solar panels, but you'll likely need eight to 10 panels if you go with the kinds of panels normally used for residential applications.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.
