Need help affording your bills? struggling, contact us right away and we'll work with you to make things manageable. The quickest and easiest way to pay your Isle of Man Energy bill is online. You can also view your bills using our e-billing platform.

Does the Isle of Man import energy from the UK?

The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby). In all future models, the Isle of Man remains dependent on GB for the provision of baseload. This is the case even where capacity is increased by building excess renewables, as the stabilisation is still provided by interconnectors.

Why does the Isle of Man export electricity from the CCGT?

GB is often short of dispatchable generation when intermittent renewables are not available, allowing the Isle of Man to export electricity produced from the CCGT. Emissions from electricity generated in the Isle of Man are attributed to the Island's Greenhouse Gas inventory, even if this power is exported for use in the UK.

How will the electricity sector change in the Isle of Man?

As the uptake for electric heating and electric vehicles increases, the electricity sector will have to grow to meet future demand. The majority of the Isle of Man's electricity is currently sourced from fossil fuels.

How are emissions affecting the Isle of Man?

Consequently, emissions in this sector are increasing as other sectors decarbonise and electrify. Electricity generation (including emissions from both the Manx Utilities and the Energy from Waste plant) is currently the dominant source of carbon emissions on the Isle of Man, accounting for 33% of the island's emissions at 245KT per year.
