

Jamaica lina battery

What makes Lina batteries unique?

Materials are abundant and thanks to our patented design, our batteries are ideal for mass manufacture. LiNa's battery cells are the building block of LiNa Energy's battery platform. The cells utilise proven Sodium-Metal-Chloride chemistry in a breakthrough planar design made possible by our ultra-thin solid ceramic electrolyte.

How do Lina batteries work?

LiNa batteries are constructed without lithium or cobalt. On charge, sodium ions from the sodium-metal-chloride cathode are reduced to sodium metal and travel through the solid-state ceramic electrolyte to the anode compartment, forming an interconnected backbone conductor.

How much does a Lina battery cost?

LiNa Energy's proprietary re-engineering of the sodium-nickel chloride battery produces a c.\$50/kWh, safe, cobalt-free, durable platform with KPI performance superior to incumbent LiBs ideal for large-format, high-growth, storage and transport markets. For more information, please visit:

What is Lina energy?

LiNa Energy is helping the energy sector accelerate the transition to Net Zero, through our safer and more sustainable alternative to lithium ion. We are leading the charge to develop and commercialise low-cost solid state sodium batteries, with a focus on the renewable energy storage market.

How does Lina energy storage work?

On discharge, the sodium is oxidised back to sodium ions and travels through the conductive backbone, recrystallising in the cathode. LiNa's energy storage systems take a radical approach to thermal management, providing customers with low-cost and high performance energy storage even in high ambient temperatures.

Tropical Battery's expected foray into the electric vehicle market through the distribution of ebikes is in limbo as the energy company awaits clarity from the Jamaican government on its tax policy regarding EVs. Tropical Battery had hoped to test the retail market with the ebikes, having imported a battery-electric fleet of 20 in mid-2023.

Stay powered up with Electro World Jamaica retailer. Shop now for a variety of batteries and chargers, including Battery Packs, Power Banks, Solar Power Banks, Alkaline Batteries, Wall Chargers, USB Chargers, Wireless Chargers, and more. ...

Our latest battery energy storage system just got a major upgrade. The LiNa Engineers have slashed the size by 50% while maintaining the same 10kWh capacity. As solar energy deployment expands globally, we're committed to solving the storage challenge. Cost-effective, longer-duration storage, like our system, is crucial
