Solar technologies are broadly characterised as either passive or active, depending on the way they capture, convert, and distribute sunlight. Active solar techniques use photovoltaic (PV) panels, pumps, and fans to convert sunlight into useful outputs. PV systems use solar electric panels to directly convert the sun's energy into electricity.

Solar panels are built with materials that physically interact with certain wavelengths of solar energy. This enables them to transform solar energy into electricity. Here's how solar panels absorb and store energy.

Jamaica solar panels store energy

What's in a solar panel? Traditional solar panels are made with silicon crystals. Silicon is a very special material.

Trusted choice in Jamaica and the Caribbean for 20+ years with global accreditations. Shop Solar Water Heaters ... gates via Wi-Fi, eliminating manual hassle. Shop Automatic Gate Openers.
