

Japan cisco smart grid solutions

What is a smart grid in Japan?

Under the Japanese smart grid model, energy demand from the customer side is managed by variations of energy management systems to control and reduce demand, from communities (CEMS) to buildings (BEMS) and households (HEMS). These types of systems manage what Japan defines as the B route, so anything that happens after the smart meter.

What is a smart grid solution?

Smart grid solutions to accelerate utility modernization, security, and reliability. Between grid reliability today and powering a better tomorrow, there's a bridge. Cisco provides solutions that improve system efficiency, resiliency, and security for the changing environmental, consumer, and regulatory conditions that utilities are facing.

How does Cisco secure the grid?

Cisco secures the grid with segmentation, authentication, visibility, and threat detection/mitigation. (PDF) See how Cisco maps grid security solutions, techniques, and services to NERC CIP requirements. See how Cisco brings IT and operational technology (OT) together for real-time decision making. (PDF)

Are smart grids a key measure of grid resiliency in Japan?

Latest update: August 2022 -- Grid stability has traditionally been one of the top priorities in Japan, and smart grids are considered a key measure that can contribute to grid resiliency.

Cisco will provide solutions for efficient, IP-based backhaul communications for smart meters that will integrate proprietary solutions into the overall smart grid platform. Cisco's Home Energy Management and Business Energy Management solutions will help optimize energy demand, use and cost by providing greater access to data and analysis tools.

São Paulo, Brazil, May 4, 2015 - Cisco will provide communications infrastructure to "Energy+", the smart metering program of Eletrobras, a major Brazilian electric utility that will serve the states of Amazonas, Alagoas, Acre, Piaui, Rondonia and Roraima. With World Bank's funding of R\$ 1,2 billion, Energia+ project will enable operational efficiency by improving service quality and ...

[illegible]

As Gary Stuebing, global smart grid standards managing engineer for Cisco's connected energy networks (i.e., smart grid) business, noted in a Monday interview, the group has a long road ahead of it.

A Smart Grid is a major advance from today, where utility companies have only basic information about how the grid is operating, with much of that information arriving too . late to prevent a major power failure or blackout. Components of a Smart Grid. A Smart Grid comprises three major components: 1) demand management,

From the "it's time to get smart about power" files: The Smart Grid, the idea of transforming the century old electrical grid in the United States into a more efficient and optimized platform for electricity management and delivery is big business "s a business in which networking giant Cisco (NASDAQ:CSCO) is very interested in playing a key role.

The move to embed Cisco IP communications continues to deliver on our promise of interoperability and open standards for OpenWay," said Philip Mezey, of Itron North America. "This enables an expanding set of smart grid applications into the future." Cisco and Itron Financial Analyst Conference Call:

In the following article, top managers from leading equipment vendors and solutions providers discuss the future of the smart grid industry. The article draws on interviews with Bob Gilligan, Vice President of Transmission & Distribution for GE; Laura Ipsen, General Manager and Senior Vice President of the Cisco smart grid

LIBERTY LAKE, Wash.--Jan. 15, 2013--Itron, Inc. (NASDAQ: ITRI) announced today that National Grid, a supplier of electricity to approximately 3.4 million customers in the Northeast, ...

Cisco Smart Grid is a holistic, cross-technology solution that enables utilities and other organizations in the energy industry to build secure, standards-based IP networks to ...

SAN JOSE, Calif. - January 17, 2012 - Cisco today announced additional solutions and services to its Connected Grid portfolio that will help utilities modernize the electric grid with built-in flexibility, security and interoperability enabled by the power of the network. Cisco's new technology architecture, solutions and related services address key utility concerns around ...

The company"s smart grid solutions deliver real, quantifiable benefits and have proved pivotal to validating the case for smart grid investment. Itron"s grid management solution provides utilities with a unified platform for managing the ever increasing complexity of the smart grid. 9. Hitachi Market cap: US\$74.37bn

Cisco Connected Grid Services deliver clear and immediate benefits to the utility, cost- effectively controlling access to critical utility assets, monitoring the network, mitigating threats, and protecting physical facilities.

Cisco smart grid solutions address every aspect of the modern utility"s network operations, from the control centers and Wide Area Networks (WANs) that provide oversight and management of the entire grid to the increasingly complex and automated substations that form the backbone of
