

# Jersey solar home systems price

How much do solar panels cost in New Jersey?

As of 2024, the average cost of solar panels in New Jersey is \$3.15 per watt, making a typical 7.2 kilowatt (kW) solar system \$15,876 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.03 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

Are solar panels free in New Jersey?

It is even possible to get your solar panels installed for FREE in New Jersey, with no money down. REMEMBER, these costs can be reduced significantly if you work with a state-licensed specialist to apply for NJ solar incentives and programs that can drastically reduce the costs of solar!

Can you save money on a solar installation in New Jersey?

In New Jersey, homeowners can benefit not only from the 30% federal tax credit but also from the state's sales and property tax exemptions and a solar renewable energy certificate (SREC) program. If you are looking to save money on a solar installation in New Jersey, you can take advantage of the following incentives.

Does New Jersey have a solar tax credit?

The federal ITC is the biggest solar incentive available to New Jersey residents, offering 30% of your system's total cost as a tax credit for the year when you have your panels installed. It's important to realize that this tax credit will only benefit you if you owe taxes since it's a credit and not a rebate.
