

As of 2009 it was the largest supplier of polysilicon in China, and is also a supplier of electronic wafers for the solar industry. GCL-Poly listed at the Hong Kong Stock Exchange in 2007.

GCL New Energy Holdings Limited is a listed company in HK (Stock code: 0451). Except for 371 MW solar farm that were constructed or acquired by the Group prior to obtaining a controlling stake in GNE, the Group primarily develops, constructs, operates and manages downstream solar farms through the platform of GNE.

Ever since its setup 16 years ago, the company has been focusing on technological innovations and laying a solid foundation for research and development. GCL cold hydrogenation and rod-shaped silicon processing and its FBR granular silicon manufacturing are self-innovated and self-developed achievements.

GCL-Poly has established a rigorous and standardised process for the admission of suppliers and system for the assessment of suppliers. After admission into the Company's supplier membership system, new suppliers are classified into three groups by source: internal recommendation, self-registration and government entities.

In the future, GCL-Poly will strive to build a low-cost, high-quality, safe and orderly world-class factory where employees feel a simple happiness. Our achievements: Qualified product rate 92% Product return and exchange rate is lower than 0.4% Sales of new products RMB3,565,240,900 32GCL-Poly Energy Holdings Limited

GCL-Poly is confident that this new particle silicon process, which is entirely dependent on independent innovation, can fill in the domestic blanks and will provide brand-new technology boost for photovoltaic generation, and also bring new profit growth points to the Group.
