Who is Kingspan Group plc?

Kingspan Group plc is a building materials company based in Ireland, trading in over 80 countries with more than 210 factories employing over 22,000 people. The company operates with six divisions; Insulated Panels, Insulation, Light & Air, Water & Energy, and, Data & Flooring, Roof & Waterproofing.

Is Kingspan a green company?

Kingspan has also been at the forefront of green finance, issuing the largest ever corporate Green Private Placement to raise EUR750m in September 2020 which will be used to support its mission of accelerating a net-zero-emissions built environment with advanced insulation and building envelope solutions.

Why did Kingspan raise a EUR50m green loan?

The company also raised a further EUR50m Green Loan to fund specific Planet Passionate initiatives. Planet Passionate is made up of 12 ambitious targets, addressing the impact of Kingspan's business operations and manufacturing on four key areas of energy, carbon, circularity and water.

When does Kingspan Group issue a trading update?

Kingspan Group plc issues a Trading Update for the period to 30 June 2024. Visit Kingspan Group for our latest results, updates & career openings. Learn more about our global sustainability programme & commitment to innovation.

What is Kingspan's decarbonisation programme?

The report outlines Kingspan's industry-leading decarbonisation programme, which targets a reduction in manufacturing carbon (CO₂e) emissions to as close to zero as technically possible, together with halving carbon intensity in its primary supply chain.

Why did Kingspan join the Born Free Foundation?

To help halt the dramatic decline in Kenya's lion population and safeguard the future of an animal close to our hearts and at the centre of our logo, Kingspan entered a three-year partnership with the Born Free Foundation.

The Kingspan Renewables KW6 has a Steel tube tower with a height of 9/11/15/20 meters. Compare power curve with other turbines. Blade diameter. Blade diameter is an important thing to look at when comparing turbines, since it effects how much power can be captured from the wind. This turbine has a blade diameter of 5.60 metres.

The building was designed and constructed with energy efficiency at its core, starting with the building envelope. Over 150k m² of Kingspan insulated panels and over 15k m² of Kingspan insulation boards enclose the facility. Natural daylight enters the building through 130 nano prismatic rooflights supplied by Kingspan Light & Air, improving occupant wellbeing and ...

Kingspan Wind KW6 is the most popular turbine in our range, regarded by many as the turbine of choice. It is ideally suited as a rural domestic wind turbine for farmers, land owners and light industrial applications.
