

Kuwait explosion proof battery box

What are explosion proof battery enclosures?

Internally, they are provided with a non-static PVC lining. And last, but certainly not least, to cover just about every conceivable environmental eventuality, our explosion proof battery enclosures are good for temperatures ranging from minus 40 to plus 55 degrees Celsius.

Why should I use a fireproof battery box?

Fireproof materials will keep your batteries 100% safe. We designed this fireproof battery box to minimize the danger and loss caused by battery explosion. (The cut foam is retained inside, so it may take some time to remove it, but it won't deform the internal foam, which is why we designed this approach)

What type of battery protection is available?

They are also certified for use with lead acid and nickel cadmium batteries. To provide the level of battery protection that meets your specific requirements, the external enclosure is available in either a hot-dipped galvanised steel or stainless steel configuration. Internally, they are provided with a non-static PVC lining.
