Swire Energy Services recognises the world needs to act swiftly and decisively to reduce carbon emissions to mitigate damaging climate change and are committed to supporting this through progressive decarbonisation. Therefore, we have set the ambition to become a carbon neutral operation by 2030 with an interim target of 65% reduction by 2025.

As the energy sector undergoes a huge transition to reduce its CO2 output in response to ever growing climate change concerns, Swire Energy Services has made a commitment to reduce its carbon emissions as part of its comprehensive sustainability strategy. Following the company's carbon reduction efforts thus far, the uptake of "green contracts" between Swire and its ...

Swire Energy Services celebrates another significant achievement, reaching 10 years without any lost time injuries (LTI) in its operations in Brazil. This achievement, combined with the recent milestone of 4,000 days LTI free in Nigeria, reflects the company's global dedication to the safety of its people.
