

PT Adaro Energy Indonesia Tbk. (ADRO) merupakan perusahaan energi yang terintegrasi secara vertikal di Indonesia dengan bisnis di sektor batubara, energi, utilitas dan infrastruktur pendukung. Disamping itu ADRO juga mempunyai lini ...

A city that is not wasting energy. Lahti, Finland's National Earth Hour Capital of 2015, has set itself the goal of reducing GHG emissions by half by 2025 from a 1990 baseline. Key to this goal is the new CHP gasification power plant Kymijärvi II, which was first in the world to efficiently generate electricity and district heating from solid waste unsuitable for recycling.

Lahti Energia's Kymijärvi II power plant in Lahti, Finland: Customer challenge: Lahti Energia was seeking to replace its old coal-fired combustion plant with a method of energy production that would be exempt ...

100 kilometers north of Helsinki, Finland, in the city of Lahti, is the world's first eco-gas fueled power plant. Lahti Energy's new Kymijärvi II power plant runs on SRF that is gasified, cooled and cleaned before combustion. The plant produces 50 MW of electricity and 90 MW of district heat for the city of Lahti.

The Lahti Energy group invests in eco-efficiency and renewable forms of energy. Since the old Kymijärvi, the coal power plant was closed and the Kymijärvi III biomass-fired plant was introduced. The homes in the area are now warmed ...

Lahti Energia's Kymijärvi II power plant utilizes hot gas filtering technology that is virtually unique on a global level, resulting in many new insights into the technology. Modifications in the technology and changes in operating ...

The sub-project in Lahti is looking for solutions to reduce the energy consumption and climate emissions of the existing housing stock as cost-effectively as possible. Renovations and energy measures of the Lahden Talot are on the main focus. Lahden Talot Oy is a company owned by the city of Lahti that builds and owns rental apartments in Lahti.

Lahti is a city with just over 100,000 inhabitants that is famous for its waste management, with less than 10% going to landfill, and several waste to energy projects, including a ST1 bioethanol production plant, gas from landfill, and the Labio biogas and compost facility, Finland's largest biogas production facility.

Lahti Energy and Nordic Ren-Gas have signed a preliminary agreement for the design of the plant. Once realised, the plant will become the largest hydrogen economy cluster in Finland. Its renewable fuel production ...
