More investment in energy capacity, energy storage and ...

BNEF has enhanced its modeling for the 2024 edition of the New Energy Outlook. The analysis now includes detailed modeling results for 12 countries and nine regions for both scenarios, and shows that:

A new report from Bloomberg New Energy Finance (BNEF) details how more than US\$8 billion will be invested in new-build energy storage in the year 2024, driven by an increase in deployment of behind-the-meter storage. Repurposed EV batteries could rival first-life storage systems - ...

In 2024, the global energy storage is set to add more than 100 gigawatt-hours of capacity for the first time. The uptick will be largely driven by the growth in China, which will once again be the largest energy storage market ...

3 ???&#0183; That is more than 2.5 times annual demand for lithium-ion batteries in 2024, according to BNEF. ... head of energy storage at BNEF. BNEF expects pack prices to decrease by ...

The global energy system will require significant capital expenditure in the coming decades to keep up with growing energy demand and transition to low-carbon energy sources. This report unpacks the investment and spending analysis ...

IRENA's 1.5&#176;C Scenario, set out in the World Energy Transitions Outlook, presents a pathway to achieve the 1.5&#176;C target by 2050, positioning electrification and efficiency as key transition drivers, enabled by renewable energy, clean hydrogen and sustainable biomass.

Tokyo, September 30, 2024 - Japan will need investment of about &#165;320 trillion (\$2.2 trillion) over the next decade if it is to stay on course to reach net-zero by 2050, according to BloombergNEF's (BNEF's) New

Energy Outlook: Japan, a ...

A new report from Bloomberg New Energy Finance (BNEF) details how more than US\$8 billion will be invested in new-build energy storage in the year 2024, driven by an increase in deployment of behind-the-meter storage. Repurposed ...

BNEF New Energy Outlook gives a long-term scenario analysis on the future of the energy economy. ... wind and electric vehicles as well as the development of new technologies such as clean hydrogen and carbon capture ...
