

Laos international solar companies

Does Laos have a solar sector?

The news is also a positive development for the Laos solar sector. Last year, the country began construction on its first large-scale solar farm, a 50MW project in the south-east province of Attapeu, and the government has already made plans to expand its solar sector further.

Why is SolarSpace launching a solar project in Laos?

The company said it has an experienced production and management team in Laos, and those people will play a leading role in the development of the nation's clean energy industry. Laos is a new manufacturing location for SolarSpace, which has traditionally been more active in solar projects in the country.

Is Laos a good country to invest in solar?

The government aims to increase the contribution of renewables to 11% by 2025, and while SolarSpace did not specify where its Laos-made modules would be shipped, the presence of a major manufacturing facility in the country is an important step in demonstrating the viability of Laos as a country capable of significant solar investment.

How many manufacturing facilities does SolarSpace have?

SolarSpace now operates a total of six manufacturing facilities, with a combined annual production capacity of 35GW, and will be keen to expand its operations elsewhere in Southeast Asia.

International investors have been attracted by the relative abundance of inexpensive electricity, the low cost of labor, Laos's centralized location in the Greater Mekong sub-region, and the improvement of transportation infrastructure. The Lao government has targeted tourism, especially ecotourism, as a major area of future growth.

The KOWEPO-LAO International Company is a 100 percent subsidiary company of Korea Western Power. KOWEPO-LAO International will operate the Xe Pian-Xe Namnoy Hydro Power Plant for 27 years which is located in Champassak and Attapeu provinces and the total capacity is 410 MW.

This section focuses mainly on the production, distribution and use of electrical energy in Laos. In Laos, electricity is a key source of energy for domestic economic activities and its export provides revenue from neighboring countries. After an economic shift to an "open door" policy in 1986, economic development has become rapid, with a change from mainly ...
