How much energy does OTEC use?

This is important, as previous OTEC projects have used a great deal of the energy they generate to run the pumps that bring the cold water to the surface. In 1981, the Tokyo Electric Power Company built an OTEC plant in Nauru that generated around 120 kW of energy, but used around 90 kW of that to run the plant.

The Government of São Tomé and Príncipe has committed to reducing the country's dependence on fossil fuels and increase the proportion of renewable energy, a goal this project aims to support. More about São Tomé and Príncipe Energy Transitions Podcast: Driving sustainability in the tropics with Ocean Thermal Energy Conversion

Developer Better Energy is deploying its first battery energy storage system (BESS), a 10MW/12MWh system, at one of its solar PV plants in Denmark. The company is installing the 1.2-hour duration BESS project at its Hoby solar park on the island of Lolland, southern Denmark, which came online in August 2023.
