

Latest policy on photovoltaic panel exports to the United States

What is the difference between US solar panel shipments and imports?

U.S. solar panel shipments include imports, exports, and domestically produced and shipped panels. The difference between imports and shipments is usually because of the lag time between when panels are imported and when they're installed.

What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:

When will solar module imports be taxable?

Pursuant to the Presidential Proclamation issued on June 6, 2022, duties will not be collected on any solar module and cell imports from these four countries until June 2024, as long as the imports are consumed in the U.S. market within six months of the termination of the President's Proclamation.

Where do US solar equipment imports come from?

Since the imposition of the Obama-era tariffs, the share of US solar equipment imports directly from China has been almost completely phased out, with imports shifting to Southeast Asia. The recent DOC decision would expand these AD/CVD tariffs to cover imports from certain companies in Cambodia, Malaysia, Thailand, and Vietnam.

How many residential PV systems are there in the United States?

At the end of 2023, SEIA estimates there were nearly 5 million residential PV systems in the United States. 3.3% of households own or lease a PV system (or 5.3% of households living in single-family detached structures). Sources: U.S. Energy Information Administration, "Electric Power Monthly," forms EIA-023, EIA-826, and EIA-861.

Are Chinese solar energy producers circumventing US import duties?

Blog by Lilly Yejin Lee & Noah Kaufman on November 13, 2023 According to the United States government, certain Chinese producers have been circumventing US import duties by exporting solar energy equipment from Southeast Asian countries to the US. New steep import tariffs are scheduled to be imposed on these companies in June 2024.

recycling-based resource recovery of PV modules in the United States. In this report we identify drivers, barriers, and enablers to PV module recycling and resource recovery in the United ...

As of the end of 2021, there was no PV cell production in the United States. The impact of the tariff on solar
