

Latvia goal solar

Does Latvia have solar energy?

So far, however, the development of solar energy in the country has been rather limited. According to Latvia's grid-operator Sadales tīkls AS, which is a subsidiary of Latvenergo, there was just 1.3 MW of renewable energy power installed under net metering at the end of 2016.

How can wind and solar power projects help Latvia?

Bringing wind and solar power projects online will also help reduce Latvia's dependence on natural gas imports and can contribute to lower electricity prices; current efforts to develop offshore wind will support this outcome.

Can Latvia achieve energy savings by renovating its building stock?

Latvia could achieve considerable energy savings by renovating its building stock. Latvia holds considerable potential to accelerate energy efficiency outcomes in the buildings sector, which will go a long way toward meeting climate targets and lowering energy bills.

What are Latvia's development cooperation goals?

Latvia promotes good governance, inclusive economic growth and security in the prioritised regions to meet its international commitments. The country seeks to raise development cooperation funding to 0.33% of its GNI by 2030. An increasing public support in Latvia for the implementation of development cooperation policy.

Will electricity be the cornerstone of Latvia's energy transition?

Electricity will be the cornerstone of Latvia's energy transition. Latvia's hydro-dominated electricity system provides a favourable starting point to use clean electricity to decarbonise other economic sectors and meet the target of 57% renewables in total final consumption by 2030.

How has Latvia managed to unlink its energy dependency from Russia?

Overall, Latvia has made considerable progress in unlinking its energy dependency from Russian imports in a short period of time, including by imposing bans on the import of electricity and natural gas from Russia in 2023. The government is also changing its storage model for oil reserves to further fortify its oil security.

According to Latvia's National Energy and Climate Plan, the proportion of renewable energy in electricity generation is expected to increase significantly, from 53% to 80% by 2030. To achieve this goal, it is necessary to expand wind and solar power production.

These projects in Latvia are pivotal for our progress towards our goal to install 4-5 gigawatts (GW) of green generation capacities by 2030," he stated. This portfolio comprises three separate solar power plants in Latvia, a 94 MW Vērmē solar project and a 145 MW Stelpe solar project, consisting of two stand-alone developments.

Latvenergo has acquired SIA DSE Aizpute Solar, developer of the EUR135 million, 265MW Aizpute solar project in Latvia, from Danish Sun Energy. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus ultrices urna eu consequat pulvinar. Suspendisse malesuada scelerisque iaculis. Cras ut facilisis arcu, posuere efficitur nisi.

Latvia goal solar

Latvia is still on track toward this goal as emissions had fallen by 59 % in 2021, though most of this was achieved between 1990 and 1995, based on economic shifts after independence from the Soviet Union. Emissions in recent years have, in fact, been ... wind and solar power projects online will also help reduce Latvia's dependence on

One of the solar parks will be located nearby a 11MW operational PV plant, pictured above, in the Madona region, Latvia. Image: Sunly. Estonian independent power producer Sunly has started ...

Goal Solar is one of the leading solar energy companies and retailers of solar power systems across Australia. Since our inception for over more than 10 years, we at goal solar have advanced ourselves as a renowned name in the field of solar electronics and as a solar retailer. Now, we stand as a recognized name in the solar energy companies ...

The company holds the rights to develop a 200 MW hybrid wind-solar project at an undisclosed location in Latvia. Ignitis, which currently operates a 4 MW solar park in Obeniai, Lithuania, will increase its total capacity to 7.4 MW this year, according to a company spokesperson cited by pv magazine.

"These projects in Latvia are pivotal for our progress towards our goal to install 4-5 gigawatts (GW) of green generation capacities by 2030," said Thierry Aelens, CEO at Ignitis Renewables. (EUR 1 = USD 1.078) Choose your newsletter by Renewables Now. Join for free!
