experiment. Then, we exploit the exogenous variation in power levels to identify the causal relationship between women's decision-making power and household demand for healthy foods. We find that the median woman's bargaining power directly before the cash transfer is 0.20, meaning that men had four times more decision making power than women ...

C'est un petit pays de 118 484 km², qui s'étire du nord au sud sur 900 km tout le long du lac Malawi, le troisième plus grand lac d'Afrique (580 km de long). Ce dernier constitue une frontière naturelle avec la Tanzanie et le Mozambique. Le quart du territoire, soit 24 204 km², est constitué par des lacs, quatre au total. Le point culminant du Malawi est le pic Sapitwa (3 002 ...
