

Wie viele Wasserkraftwerke gibt es in Liechtenstein?

Die Liechtensteinischen Kraftwerke setzen wo immer möglich auf erneuerbare Energie aus Wasserkraftwerken und Photovoltaikanlagen. Weiter investieren wir laufend in den Ausbau von erneuerbaren Stromproduktionen. Wir verfügen über zwölfe eigene Wasserkraftwerke, die zusammen circa 18 Prozent des benötigten Stroms in Liechtenstein produzieren.

Wie hoch ist der Eigenversorgungsgrad in Liechtenstein?

Mit einem Eigenversorgungsgrad von circa 25 Prozent muss Liechtenstein zwar einen Grossteil seines Stroms importieren, jedoch deckt die inländische Stromproduktion den Bedarf aller privaten Haushaltskunden der LKW ab. Das heisst, es wird genügend Strom in Liechtenstein produziert, um jede private Steckdose mit erneuerbarer Energie zu speisen.

Wie viele Photovoltaikanlagen gibt es in Liechtenstein?

Der Bau von eigenen Photovoltaikanlagen unterstützt dieses Ansinnen. Die LKW betreiben 18 eigene Photovoltaikanlagen und produzieren damit jährlich 866 MWh erneuerbaren Strom. Die LKW Solarstrom Anstalt befindet sich zu 100 Prozent im Besitz der Liechtensteinischen Kraftwerke.

The Establishment is a type of legal entity which can only be found in Liechtenstein and therefore is a Liechtenstein particularity. One of the major arguments for the formation of an Establishment is that it can be used for a great number of purposes due to its flexible characteristics.
