

What is New England Bess?

The New England BESS is being built through the support of the NSW Government's Emerging Energy Program. In 2023, ACEN Australia secured a 20 year Long Term Energy Service Agreement (LTESA) for New England Solar in the NSW Government's first renewable energy and storage auction.

What is the New England Bess project?

Currently supported by the NSW Government's Emerging Energy Program, the New England BESS project is a part of ACEN's broader strategy in Australia, where they are actively developing over 1 GW of projects.

What does Bess stand for?

3 June 2024, New South Wales, Australia - ACEN Australia recently awarded the Engineering, Procurement and Construction (EPC), and Operations and Maintenance (O&M) contracts for its New England 200 MW/2 hour Battery Energy Storage System (BESS).

What is the New England battery project?

The New England battery project is a part of ACEN's broader strategy in Australia, where it has more than 1 GW of large-scale renewable energy generation in construction and operations, and more than 13 GW capacity in the development pipeline. This content is protected by copyright and may not be reused.

What is a Bess & how does it work?

The BESS will be charged and discharged on a daily basis and designed to dispatch stored renewable energy at peak consumption hours to help meet the high demand during New South Wales' peak load hours while reducing the region's reliance on coal-fired power generation.

When will a Bess project start?

Construction of the BESS projects will begin in H2 2024 and commercial operations will commence in 2025 and 2026. The finalisation of contracts is under way, with formal execution expected in the first half of May 2024. The agreement includes the installation of a 50MW/100MWh BESS and a 150MW/300MWh BESS.

Mai 2019 wurde anlässlich der 300-Jahr-Feierlichkeiten der Liechtenstein-Weg eröffnet. Die mehrtägige Wanderung ist bei Einheimischen wie auch bei ausländischen Gästen sehr beliebt. ...

In 2022, the company was selected to provide the BESS at Victoria's 330MW Meadow Creek solar PV plant. Renewable energy developer Acen Australia appointed Energy Vault earlier this year to provide a 200MW/400MWh BESS for its New England project in New South Wales. This would also be co-located alongside a 720MW solar PV power plant.

In 2022, the company was selected to provide the BESS at Victoria's 330MW Meadow Creek solar PV plant. Renewable energy developer Acen Australia appointed Energy Vault earlier this year to provide a ...

Transgrid Group's contestable business, Lumea, has signed an agreement with ACEN Australia to connect a new Battery Energy Storage System (BESS) as part of the New England Solar Farm project. Stage one of ACEN Australia's \$768 million project is currently under construction near Uralla in the proposed New England Renewable Energy Zone (REZ).

13 March 2024, NSW, Australia - ACEN, through its wholly owned subsidiary, ACEN Australia, and SmartestEnergy have signed a Power Purchase Agreement (PPA) to offtake renewable electricity generated from Stage 1 of ACEN Australia's New England Solar project in NSW. The eight-year agreement provides SmartestEnergy with an offtake of 25% of the output of the...

Get all the latest news on New England Solar Stage 1 operations and Stage 2 design and construction from our regular project updates. The updates are published each month in the Uralla Wordsworth and can also be found here on our website.

Along with advancements in safety, BESS will also see innovative developments in technology this year. The BESS industry has been dominated by lithium-ion batteries, but the need for more long-duration storage, which cannot currently be done economically and safely with lithium, will open the door for promising non-lithium technologies.

Energy Vault has been appointed to lead the construction of ACEN Australia's 200MW/2-hour New England Battery Energy Storage System (BESS) in New South Wales, which is set to commence this year and be operational by 2026.. Related article: Solar grazing sheep flock grows to 6,000 at New England The battery is another milestone for ACEN Australia and is co ...

Updating the New York Fire Code will increase the safety and standardisation of installations in the state, Energy-Storage.news has heard. ... and emergency response to ensure the greatest level of safety for BESS across the New York State," the company said. ... Informa PLC's registered office is 5 Howick Place, London SW1P 1WG. Registered ...

ACEN Australia and Energy Vault to begin deployment of two battery energy storage systems (BESS), with a total capacity of 200 MW/400 MWh, at ACEN Australia's 720 MW New England Solar project

Under the agreement, Energy Vault will deploy both a 50 MW/100 MWh BESS and a 150 MW/300 MWh BESS at ACEN Australia's 720 MW New England Solar, one of the largest solar projects to participate ...

Renewable asset developer ACEN Australia has awarded Engineering, Procurement and Construction (EPC) and Operations and Maintenance (O& M) contracts for its New England 200MW/400MWh battery ...

The vertically integrated manufacturer's new battery energy storage system (BESS) includes the company's own 306Ah high energy density lithium iron phosphate (LFP) cell, enabling 4,073kWh nominal capacity in a standard 20-foot container. ... Having announced the first commissioned project for Elementa in East England at the Energy Storage ...

A critical component of this plan entailed the development and construction of a 6 megawatt (MW)/48 megawatt-hour (MWh) Battery Energy Storage System (BESS), the largest of its kind in New England. The BESS was built by Tesla. In addition, a new 15 MW generator and power control house was installed.

Construction began in 2021 on New England Solar Farm near Uralla, which will pair 720MW of solar PV with a 50MW/50MWh BESS, with further details given in a progress update offered in March this year. CWP Renewables has approval for another NSW BESS project at a wind farm, this time a 150MW battery storage system for connection at Uungula, a ...

The coalition of New England states is applying with two projects: Power Up New England, which will upgrade and add new grid interconnection points between the southeastern parts of Massachusetts and Connecticut, and Clean Resilience Link, which would increase electricity transfer capacity between New England and New York. ... (BESS) assets at ...
