In a shift from the traditional electric power paradigm, utilities and utility customers are installing distributed generation (DG) facilities that employ small-scale technologies to produce electricity closer to the end use of power. Driving this exponential growth is the dramatic decrease in the price of solar panels, as well as state, federal, and utility incentives for solar panel ...

3.1 Solar Energy. Solar Energy is the most abundant of renewable energies, and it is available at any location, with higher values/yields closer to the Equator, e.g. 1400-2300 kWh/m² in Europe and US and around 2500 kWh/m² in Tanzania, East Africa . The total solar irradiation of the sun is about 50 million Gigawatt (GW) (Fig. 2.6).

Lithuania dg solar panels
