

Long duration storage technologies South Georgia and South Sandwich Islands

Stephen Crosher, CEO of RheEnergise, advocated for scalable long-duration energy storage (LDES) solutions to support the global energy transition at the Reset Connect conference in London on 25 June. According ...

The island of South Georgia is unusual among oceanic islands for having pre-Cretaceous sedimentary rocks underlying much of the island and a significant portion of felsic igneous rocks. Two-thirds of the island consists of intensely folded flysch, capped with Aptian age fossils, tuff and greywacke in the Cumberland Bay Series.

Many remote islands present barriers to effective wildlife monitoring in terms of challenging terrain and frequency of visits. The sub-Antarctic islands of South Georgia and the South Sandwich ...

South Georgia and the South Sandwich Islands sit about 4,000 kilometres (2,500 miles) north of Antarctica and 2,700 kilometres (almost 1,700 miles) east of South America in the South Atlantic Ocean. In 2012, the United Kingdom established a sustainable use marine protected area (MPA) around these largely uninhabited islands to manage the local fishery ...

To effectively manage these fluctuations and enhance energy efficiency, integrating Long-Duration Energy Storage (LDES) technologies is essential. LDES systems enable data centers ...

A visit to the South Georgia Islands is typically combined with a cruise of the Falkland Islands and Antarctica. The South Sandwich Islands are even more remote and are rarely visited by cruise ships. Travelers to the Georgia Islands will get to see large king penguin and elephant seal colonies, the remnants of the island's once prosperous ...

The future marine protection of South Georgia and the South Sandwich Islands has been a long-standing campaign for the APPG and our associate members, including the Pew Trusts, and featured in our recent "Keeping 1.5 alive" report, which sets out nine priorities for the forthcoming COP28 summit, which begins next week.

northernmost island in the South Sandwich Islands group, 342 miles (550 km) to the east-south-east. The island group covers 1,450 square miles (3,755 square km) and ranks as the third-largest sub-Antarctic archipelago after the Falkland Islands and Iles Kerguelen. South Georgia itself is 106 miles (170 km) long and 1.2 to 25 miles (2 to 40 km ...

The CEC's Energy Research and Development Division is conducting its own testing on performance, safety and reliability independent of what each energy storage company does, Mike Gravely, the division's energy storage lead, said in a presentation to commission members at the CEC's June 16 business meeting.

South Georgia is situated 800 miles SE of the Falkland Islands. The main island of South Georgia is approximately 170 km long and between 2 and 40 km wide and occupies an area of 3,755 km², more than half of which is permanently ice covered. The coast is rich in wildlife and home to huge colonies of penguins, seals and albatross.

Demand for long duration energy storage (LDES) technologies will increase in the 2030s to facilitate increasing variable renewable energy (VRE) penetration. Key technologies being developed for LDES, offering lower capital costs (\$/kWh) than Li-ion at longer durations of storage, will be needed for supporting increased VRE penetration. This IDTechEx report ...
