Is the longi Hi-mo 4 a good solar module?

The LONGi Hi-MO 4 solar module proves this by appealing to a broad spectrum of module purchasers internationally. Energy-dense, the LONGi Hi-MO 4 remains within the highest calibre of module efficiency. However, the intention of the Hi-MO 4 isn't to break module efficiency records (this would inevitably raise the cost to recover additional R&D).

Is Longi Hi-mo 4 in demand?

From well-researched residential module purchasers through to industry-scale project developers, there's no question the LONGi Hi-MO 4 is an in-demand solar module globally. However, with a more general award status, the curious investor raises an obvious question: What specifications make the LONGi Hi-MO 4 solar module range in demand by so many?

What is a Longi Hi-mo 4 module?

A series of 166mm Gallium-doped wafers form the LONGi Hi-MO 4 module design foundation, converted into three variants; 60-cell, 66-cell and 72-cell options. Whether module purchasers notice a distinguishable design difference on face value between the LONGi Hi-MO 4 and alternative half-cell module types is unlikely initially.
