

Looking for labor to install photovoltaic panels

What does a solar photovoltaic installer do?

Solar photovoltaic installers are key to the process of solar panel installation and maintenance. They use specialized skills to install residential and commercial solar projects. They are responsible for safely attaching the panels to the roofs of houses or other buildings and ensuring that the systems work.

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

How much does solar installation cost?

According to the NREL data above, installation typically accounts for 5.5% of the total cost of a residential solar project, so this equation will get you a ballpark figure for labor costs. For example, if you receive a solar quote for \$25,000, you can expect labor to make up around \$1,375 of the all-in cost.

Do plumbers & electricians work on solar installation projects?

Plumbers and electricians working on solar installation projects must also have specialized training on the systems that they will be installing, or they must work under the supervision of a qualified solar photovoltaic installer.

Can a self-employed solar installer install a solar panel system?

When a solar panel system is purchased, manufacturers may provide the buyer with installation services or maintenance and repair work. Self-employed installers typically have training and experience with installing solar power systems and are hired directly by the property owners or by a construction firm.

Do you need a solar panel installation company?

A solar panel installation company can help homeowners determine the best setup for their home and their budget. When installing a solar panel system, on-grid or off-grid systems are available. An on-grid system will reduce a homeowner's dependency on the power grid but not eliminate it.

The other side of installation work is roofing - installing the panels themselves, and their rails or mounts, wiring the roof junction boxes, and such. Less wiring intensive than being an ...
