Are solar panels worth buying in the UK in 2024?

Solar panels can help reduce energy bills by up to £600 per year for an average-sized home. Solar panels are a great environmentally friendly way to produce free electricity for your home. However, the question remains, are they worth buying in the UK in 2024?

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Can you get free solar panels in the UK?

Solar panel grants like the ECO4 scheme can help consumers get free solar panels in the UK. Currently, there is 0% VAT on solar panels, batteries, and other renewable energy products, allowing for a discount of over £2,850 on the purchase of a 4kW system.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Why should you join solar together in West Yorkshire?

We have partnered with iChoosr Ltd, independent experts in group-buying, to bring Solar Together to West Yorkshire. Making buying solar panels easier and more affordable. Installing solar panels can lower your bills, and by joining our group-buying scheme, you can get an even better deal.

Who is eligible for solar PV panels?

To be eligible for solar PV panels, your home needs to meet these specific requirements: Have an income of less than £31,000. Currently have an inefficient heating system within the D-G energy efficiency band. Own your home and live in it, or live in private rented accommodation (requires permission from the landlord).
